

CROWDSOURCING APP TEST LOGGED ISSUES

WHO WE ARE

To Be the Leading Catalyst for
A Thriving, Digitally Empowered
Ethiopia and Beyond.

Simplifying Lives and Accelerating Ethiopia's Digital Transformation and Beyond Through Reliable Communication, Innovative Digital Solutions, and Seamless Digital Financial Services That Empower Communities, Businesses and Nations Far Beyond Connectivity.

- Human-Centric
- Togetherness & Collaboration
- Excellence
- Integrity & Trust
- Innovation
- Socially Responsible & Impact-Driven

Empowering Ethiopia's Digital Future & Beyond

STRATEGIC THEMES

NEXT HORIZON **Digital & Beyond** **2028 STRATEGY**

Empowering Ethiopia's Digital Future & Beyond

Digital-First,
Customer-Centric
Experience Excellence

Business Diversification,
Innovation & Sustainable
Value Creation

Technology Innovation
& Digital Solutions Leadership

Empowered,
Agile & Future-Ready
Human Capital

AI-Powered & Digitally-Driven
Operational Excellence

Trusted Brand,
Purposeful Impact
& Sustainable Future

STRATEGIC PRIORITIES

Digital Transformation,
Inclusion & Empowerment

Customer Experience
Excellence

Business Diversification,
Regional Expansion &
Global Play

Empowered &
Future-Ready Digital
Talent & Culture

Network & Systems
Leadership & Future-Ready
Infrastructure

Network & Systems
Excellence

Platform Economy &
Innovative Fintech
Solutions

Financial Resilience &
Sustainable Financing

Operational Excellence,
Smart Investment &
Resource Optimization

Enterprise & Sector
Solutions Leadership

R&D, Innovation,
Technology Adoption &
Commercialization

Regulatory Compliance &
Stakeholder Engagement

Technology Innovation, Big
Data, AI & Intelligent
Operations

Innovative Products,
Services & Device
Penetration

Manufacturing &
Technology Ecosystem
Collaboration

Cybersecurity, Data
Privacy & Risk
Management

Energy Efficiency &
Green Infrastructure

Market Leadership &
Brand Trust

Strategic Partnerships &
Ecosystem Development

Sustainability, ESG &
Responsible Growth

Elevate Customer Satisfaction & Experience

Drive Business Diversification, New Growth Engines, and Regional Expansion

Drive Operational Excellence & Achieve Cost Optimization

Achieve and Sustain a High EBITDA Margin

Enhance Employee Satisfaction and Drive an Agile, High-Performance Team

Market Leadership

Empowering Ethiopia's Digital Future & Beyond

TEST RESULTS _ MOBILE APP

S. N	Application side	Logged Issues	Corrective Action	Status	Remark
1	Naming and icon	The Crowdsourcing App. logo and naming need adjustment	Rename the App as “teleCrowd” and change the icon	Open	
2	Data Validity _ dashboard page	Download speed, upload speed, and latency measurement score seem far too real measurements _ the figures remain static even after full test	The throughput shall be aligned with the common test outputs like Oakla/Ethio telecom speed test results	Open	
3	Menu Tab visibility	The menu tab (dashboard, voice, data and Map) are not visible and requires adjustment	The tab shall be adjusted just like any other mobile App size	Open	
4	Voice Tab	During capture metrics, the success notification says “call listener started”	Change it to “Capturing metrics started”	Open	
5	Voice Tab	On the Warning message, there exists call listener	Replace call listener, and rewrite the warning message	Open	
6	Voice Tab	The voice metrics result (CSSR, CDR and average call setup time) remain static after taking sample tests	The result shall dynamically change whenever tests are conducted	Open	
7	Voice Tab	Last disconnect reason is not required on the App	Remove the last disconnect reason as we will not have such kind of data to display	Open	
8	Data tab _ Full test	When conducting full test, the test pages are not visible	It shall display the pages and the type of test sequentially	Open	

TEST RESULTS _ MOBILE APP

S. N	Application side	Logged Issues	Corrective Action	Status	Remark
9	Data tab _ Browsing	Use the provided webpage URLs to test browsing and calculate the score _ currently only Wikipedia is running	- For Browsing(All shall be considered as a default) https://www.google.com/ https://www.facebook.com/ https://www.amazon.com/ https://www.chatgpt.com/ https://www.wikipedia.com/	Open	
10	Data tab _ Streaming	During streaming test, the test shall load the video and finish to show the result	Use the below URL since the duration is small https://www.youtube.com/watch?v=aJq936yAUbc	Open	
11	Data tab _ HTTP DL	The file size is 13.19KB and the throughput result is static at 108.03Mbps	The file size required is 10Mbps and the throughput shall dynamically update based on the performance. In addition, there shall be progress page till it finalizes the test.	Open	
12	Data tab _ HTTP UL	The file size is 100KB and upload progress shall be visible	The file size required is 5Mbps and the throughput shall dynamically update based on the performance. In addition, there shall be progress page till it finalizes the test.	Open	
13	Data tab _ Social Media	When conducting full test, the test pages are not visible	The page shall be visible and consider the below social media pages: https://www.facebook.com/ , https://www.x.com/ ,	Open	

S. N	Application side	Logged Issues	Corrective Action	Status	Remark
14	Data tab _ FTP DL & UL	When conducting FTP DL test, the throughput is exaggerated (>30Gbps). In addition, the test is device selective _ not working with Wudineh phone	The result accuracy shall be checked, and the test shall work with different devices	Open	
15	Data tab _ Latency	The score is fixed (0/100)	The score logic needs to be understood	Open	
16	Map tab	There is unknown network technology	There shall not be unknown technology unless we cannot get the data from the backend	Open	
17	Map tab _ Cell ID	The serving cell ID shows similar for different technology	Cell ID shall be different for different technologies and shall call the right ID	Open	
18	Map tab _ RSRP and RSRQ	The result figures requires validation		Open	
19	History Page	During saving the snapshot, it displays Scores and metrics results	There shall not be score visibility here	Open	
20	App Info	There is no need to display the scoring standard	Removing scoring standard and rename about page as "teleCrowd App"	Open	
21	Notification Tab	The notification tab is inactive		Open	

TEST RESULTS _ WEB PORTAL

S. N	PORTAL SIDE	Logged Issues	Corrective Action	Status	Remark
1	Dashboard	The output data has manipulation errors _ sometimes it is not calculating latency even	There shall be scores based on the test	Open	
2	QoE Metrics	Though the test conducted via App, it's not capturing the record on the portal	Capturing data is critical to properly analyze the scores	Open	Critical
3	Filter	When data requested via specific date range, the export option displays all data instead of the requested date	Exported data shall be aligned with the date range	Open	
4	Call Drop	There existed 26 call drops which we can't verify		Open	
5	Video Resolution	The scoring and resolution has different figure	The video resolution and scoring shall be mapped	Open	
6	Enhanced analytics Page	The following results are not displayed 1. Voice _ Call Setup Time(Average) 2. Data a) Browsing (Browse completed); b) Streaming (Average MOS; MOS < 3.8 (%); Setup Time > 5s (%); Average Setup Time) c) HTTP DL_ Average Throughput; 10th and 90th Percentile d) FTP DL_ Average Throughput; 10th & 90th Percentile e) Social Media _ Duration > 5s (%); Average Duration f) Latency & Interactivity _ Interactivity Success Ratio; Average Score	The scoring result shall be mapped and displayed	Open	

Thank You!
